

Sonoran Bloom  *Wellness Study*

October 28, 2009

Dear Health Care Provider Professional,

This brings great joy and excitement to send you this news of my willingness to assist you with the opportunity to improve your client's health and wellness.

This is an opportunity where I am proposing to jointly partner with you; I will provide all of my available human and financial resources to assist in augmenting these services.

To this point, as a health care provider I am sure that your primary goal is to provide your patients with the best and safest therapies available, with the concern of providing them with products and treatments that will regain their health to the optimum level.

In today's world many of the pharmaceutical therapies can cause irreversible side effects. However, when judging what is best for patients many times the side effects appear to have far less consequences than does the illness. Therefore they are prescribed and we all hope for the best.

Well I am here to tell you that I have been working with a world renowned nutraceutical company out of Scottsdale Arizona TriVita Inc. Over the past 10 years they have been providing wellness to many of your class of clients using nutraceutical products that do not display any side effects and they are having tremendous positive therapeutic responses for those who continuously use them.

In March of 2009 Trivita launched a new product line, the Sonoran Bloom. All of the products affiliated with this launch are extracted from the plant life in the Sonoran Desert. To keep this brief studies on these nutraceuticals have been conducted over the past 10 years by Major Medical Institutions and Universities with outstanding results. Over 200 laboratory and human tests have been performed and the full monograph is available for review.

As you are well aware; Chronic Inflammation is now occurring in epidemic proportion specifically in the U.S., yet is migrating around the world. Chronic inflammation allows and leads the pathway to Fibromyalgia, Asthma, Arthritis, neurological complications, Cardiovascular diseases, auto-immune disorders, respiratory mayhem, Alzheimer's, allergies, and so on.

In today's world most of the pharmaceuticals that are used can have tremendous side effects and cause long term or permanent impairments for the consumer.

If you have kept up with the studies, then I am sure that you are aware of a rare but potent antioxidant called betalains. This antioxidant is found in the plant life around the world, but the most potent extraction has come from within the Sonoran Desert region in Arizona and Northern Mexico. These betalains are extracted from the Nopal Cactus, and have been sited to carry 24 of these unique antioxidants, the richest source throughout the entire world.

The product that is being sold is called Nopalea and was introduced in March of 2009. TriVita has received over 1000 unsolicited testimonies from customers around the U.S. and Canada stating that by continuously consuming the Nopalea therapy their inflammation conditions have subsided and in many cases is gone.

This is not a surprise to TriVita or their Chief Science Officer Dr. Brazos Minshew as he has been seeing these results for several years in over 200 clinical controlled studies. Medical Science is reporting that this specific therapy is bearing vast improvements in reducing or eliminating rampant inflammation, enhancing cardiovascular conditions in clogged arteries and major blood vessels, lung disorders, pain conditions in the joints, muscles, and nervous systems.

The reason that I am sending you this information is twofold. First and foremost I want to get this therapy into as many of the chronic inflammation sufferers as possible; so that they can receive the relief that thousands of others are experiencing right now. And second after talking to Dr. Minshew he stated that many health providers could use another source of income to augment their life style.

He made it clear that professionals like yourself are over worked and do not have the time or energy to invest time or effort into supplementing their income. He also stated that as a professional who came out of the day to day medical grind he said that your ability to get free time or a vacation is becoming more difficult, with health care costs being squeezed by the insurance companies and the government; thus your fees for service are being reduced in both directions.

Therefore, health providers like yourself are in need of increasing your earning without the time, energy, or expenses needed to support an activity like this. This is where I come in. I will do all of the work and allow you to collect the financial rewards.

It is very simple; first I want to provide you with a free sample of the Nopalea product so that you can experience the benefits of this nutraceutical first hand. As a health care provider you know that you are subject to chronic inflammation just as your patients are. In fact because you are exposed to so many different infectious diseases and toxins it becomes easier for you to become involved with inflammation. Therefore, it would be my pleasure and honor to provide you with our gift of health to boost your immune system.

Once you have seen how great the product tastes and you realize the benefits it is providing for you we will go to the next step and allow your clients to experience the same at no cost to them. I and my group will fund this entire venture. It will not cost you a penny.

And when your client asks you about the product you can then say that you have tried it and you can give them your honest opinion. Mean while as your client shares this wellness experience as you and others; and decides to purchase Nopalea and use it on a regular basis; I will immediately inform you of their status and sign you up as a company affiliate at zero cost and complete all of the paper work. You will then start earning 20% of each purchase that they make for life; and I earn 4%. It is that simple.

We have been testing this around the U.S. for several months now and have learned that many practices like yours; has an equivalent patient association, of 4,000 to 10,000. And simply by putting the Secret Killer-Wellness post card at the reception's desk in the offices, 50% of the clientele take a postcard and 10% end up purchasing the product online without any further introductions. You see your patients trust you and respect your opinion. So the first step is for you to test drive the product for yourself; as when it is working for you, then it will also work for others. We also have sent out emails to many of the doctors clients per their permission and are receiving positive responses at about the same 10% rate. This entitles your patience to receive Dr Minshew's weekly wellness reports providing them with optimum health and wellness tips; leading them more remarkable products that will strengthen their immune systems over time.

As a side note, it works for me. I have an auto-immune disease called Neurosarcoidosis, and have had it for over thirteen years. Until I found Nopalea, nothing I used stopped the pain, and I mean nothing. I am pouring 20 mg of toxins in my body daily. I needed something to fight off this inflammation generating product (prednisone). Nopalea has given me a new start in life. I am not cured, but I am in control of my pain, which allows me to function as a normal human being.

Just give me a call, I will provide you with a 5 to 10 day supply of Nopalea, you will take 3 to 6 oz daily. You will receive the Nopalea Monograph outline of the over 200 medical studies completed throughout the world, and you will be provided with your own unique supply of "The Secret Killer – Wellness" postcards that are to be placed in your reception area of your office for your clients to take one. There is no hard selling. The purpose of the post card is to get information into your client's hands and encourage people to try a free 5 to 10 day supply of Nopalea. We know at this dosage level it will reduce or eliminate 99% of any inflammation issues that they may be having and will provide them with their own wellness experience.

And finally we all know that there is a tremendous lack of nutrients in the food we consume today. We know that people need to supplement these nutrients as the plants and proteins that we are consuming do not meet these needs. Pharmaceuticals help to control the symptoms cause by these lack of nutrients; Nopalea can provide both the nutrients and the protection needed to eliminate the toxins and infectious elements in your body.

I would love to take you out to lunch and spend a couple of minutes reviewing this information with you personally. As I believe this will be time well spent for both of us. And will allow you to get free for a short period of time during your busy schedule. If you could send me a very brief email stating the best way to schedule this time it would be greatly appreciated, I would welcome your admin to do this for you.

Warm regards and God Bless,

Robert J. Casper
